ASSIGNMENT 1

1.Write a program to :

A)add two integer numbers.

ANS:
```
class Addtwointegers
 {
  public static void main(String args[])
   {
     int a= Integer.parseInt(args[0]);
     int b= Integer.parseInt(args[1]);
     int sum=a+b;
     System.out.println("Sum of 2 Integers ="+sum);
    }
  }
```
Output:
javac Addtwointegers.java

E:\JAVA2026>java Addtwointegers 100 2
Sum of 2 Integers =102

B)add one float number and integer number.

ANS:
```
class Addtwonumbers
 {
  public static void main(String args[])
   {
     int a= Integer.parseInt(args[0]);
     float b= Float.parseFloat(args[1]);
     float sum=a+b;
     System.out.println("Sum of 2 Integers ="+sum);
    }
  }
```
Output:
javac Addtwonumbers.java

E:\JAVA2026>java Addtwonumbers 5 505.66
Sum of 2 Integers =510.66

C)print your name and age

ANS:
```
class NameAge
{
    public static void main(String args[])
    {
        String name = args[0];
        Integer age = Integer.parseInt(args[1]);

        System.out.println("Name: " + name);
        System.out.println("Age: " + age);
    }
}
```

ASSIGNMENT 1

Output
E:\JAVA2026>javac NameAge.java

E:\JAVA2026>java NameAge RAMU 23
Name: RAMU
Age: 23

D)calculate are of triangle

ANS
```
class Areatriangle
{
   public static void main(String args[])
   {
      Float base =Float.parseFloat(args[0]);
      Float height =Float.parseFloat(args[1]);

      Float area =(base * height) / 2;

      System.out.println("Area of Triangle = " + area);
   }
}
```
Output
E:\JAVA2026>javac Areatriangle.java

E:\JAVA2026>java Areatriangle 8 14
Area of Triangle = 56.0

2.Write a program to swap two numbers with temporary variable.Print numbers before and after swap.

ANS:
```
class Swapvariables
{
 public static void main(String args[])
  {
   int a=15;
   int b=20;
   System.out.println("Before Swapping : ");
   System.out.println("a = "+a);
   System.out.println("b = "+b);
   int tempV=a;
   a=b;
   b=tempV;
   System.out.println("After Swapping : ");
   System.out.println("a = " +a);
   System.out.println("b = " +b);
}
}
```

Output
E:\JAVA2026>java Swapvariables
Before Swapping :

ASSIGNMENT 1

```
a = 15
b = 20
After Swapping :
a = 20
b = 15
```

---

3) .Write a program to swap two numbers without temporary variable.Print numbers before and after swap.

ANS:

```
class Swapping
{
 public static void main(String args[])
  {
   int a=15;
   int b=20;
   System.out.println("Before Swapping : ");
   System.out.println("a = "+a);
   System.out.println("b = "+b);
   a=a+b;
   b=a-b;
   a=a-b;
   System.out.println("After Swapping : ");
   System.out.println("a = " +a);
   System.out.println("b = " +b);
}
}
```

Output:

```
E:\JAVA2026>javac Swapping.java

E:\JAVA2026>java Swapping
Before Swapping :
a = 15
b = 20
After Swapping :
a = 20
b = 15
```
